Homepage

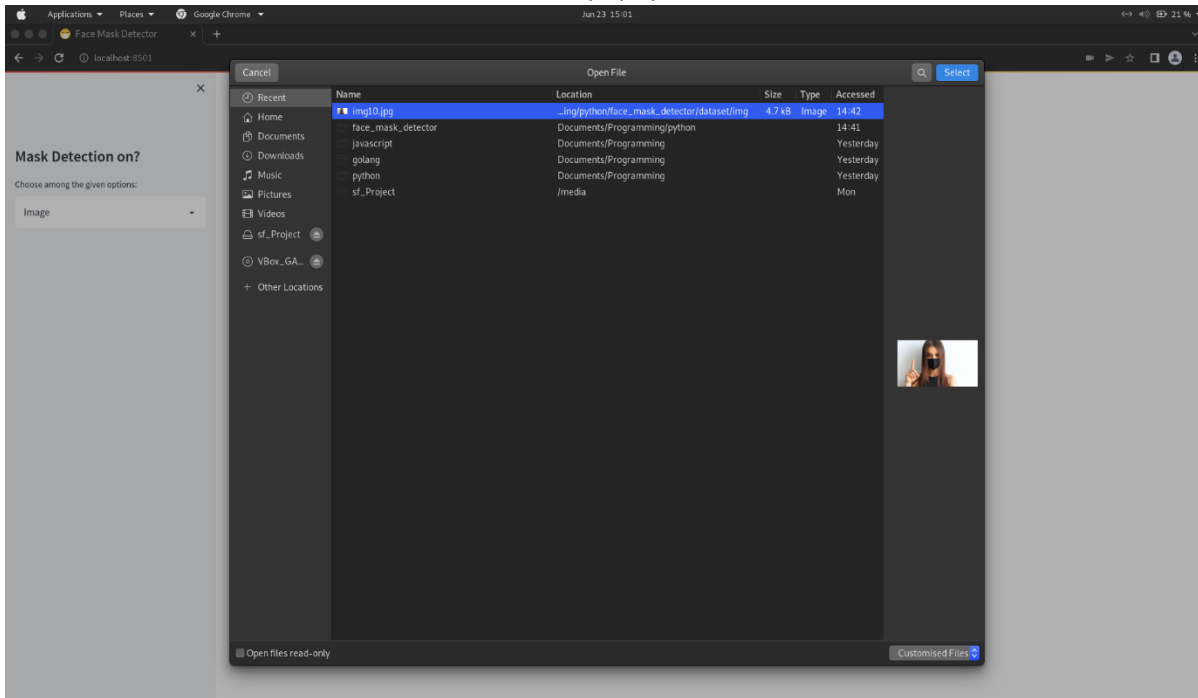

I divided side bar as selection menu with two option 1st is image 2nd is webcam: -

First thing anyone will see is a pop-up window on Homepage which will ask for User Inputs like whether he/she wants to go for mask detection using image then upload image from device.

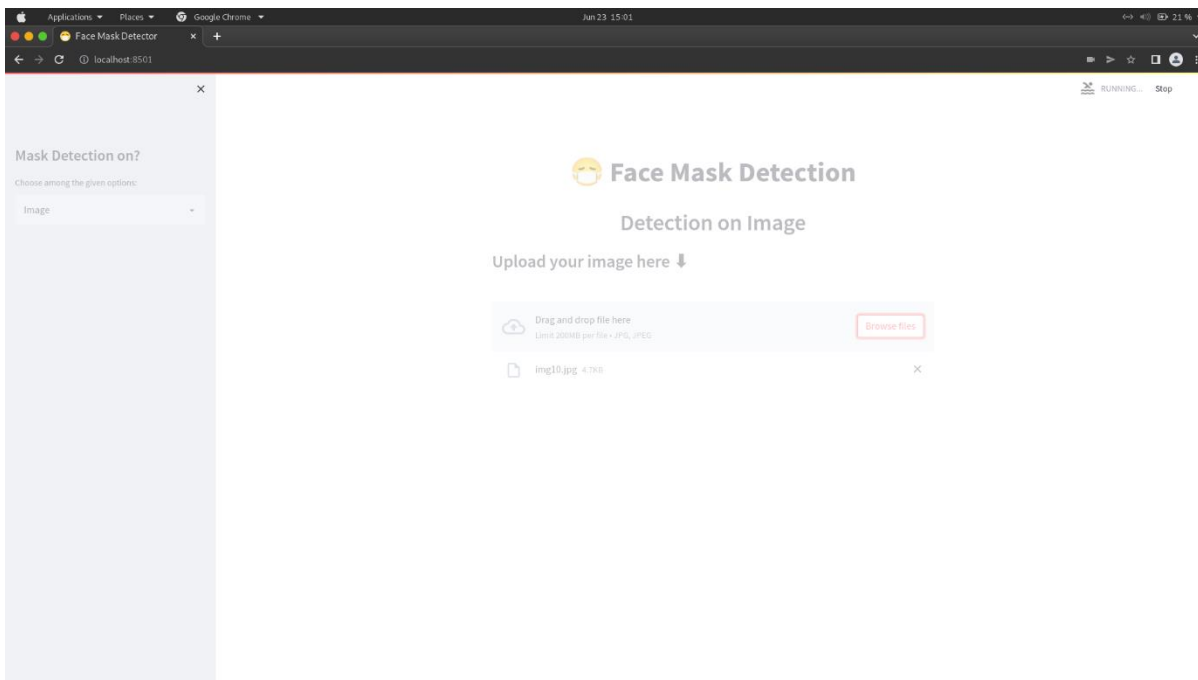

The user will select Browse file after selecting image (in jpg format, and not more than 200mb) section.

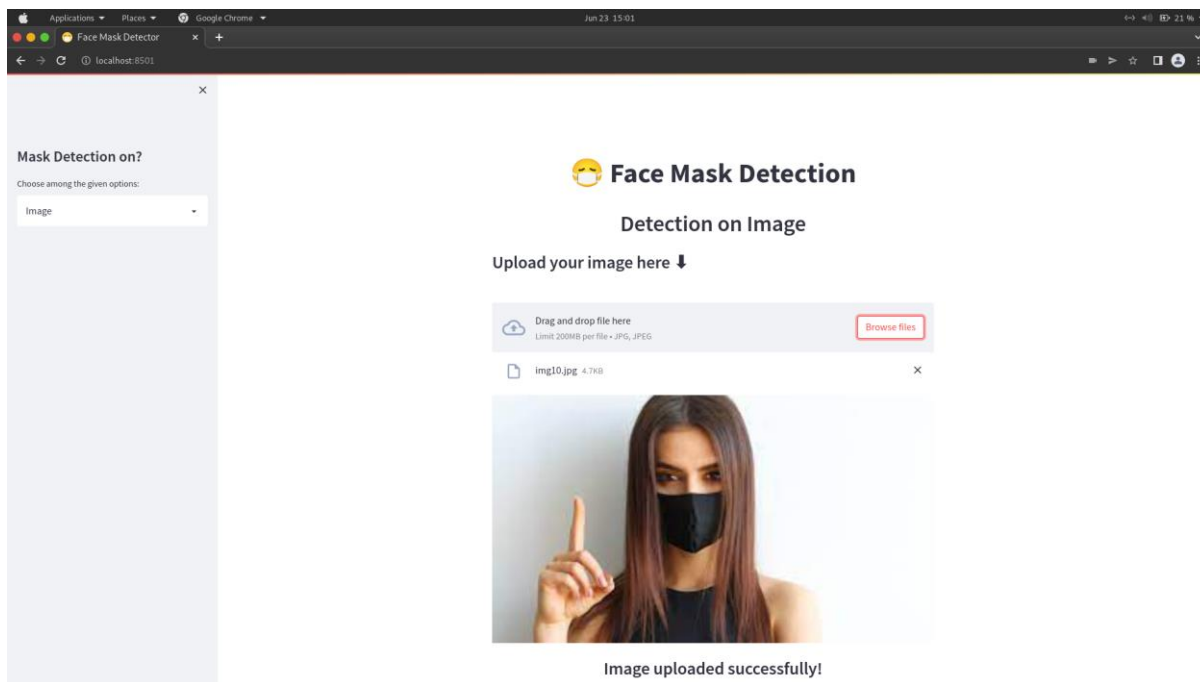

This is how we can browse file after this window popup.

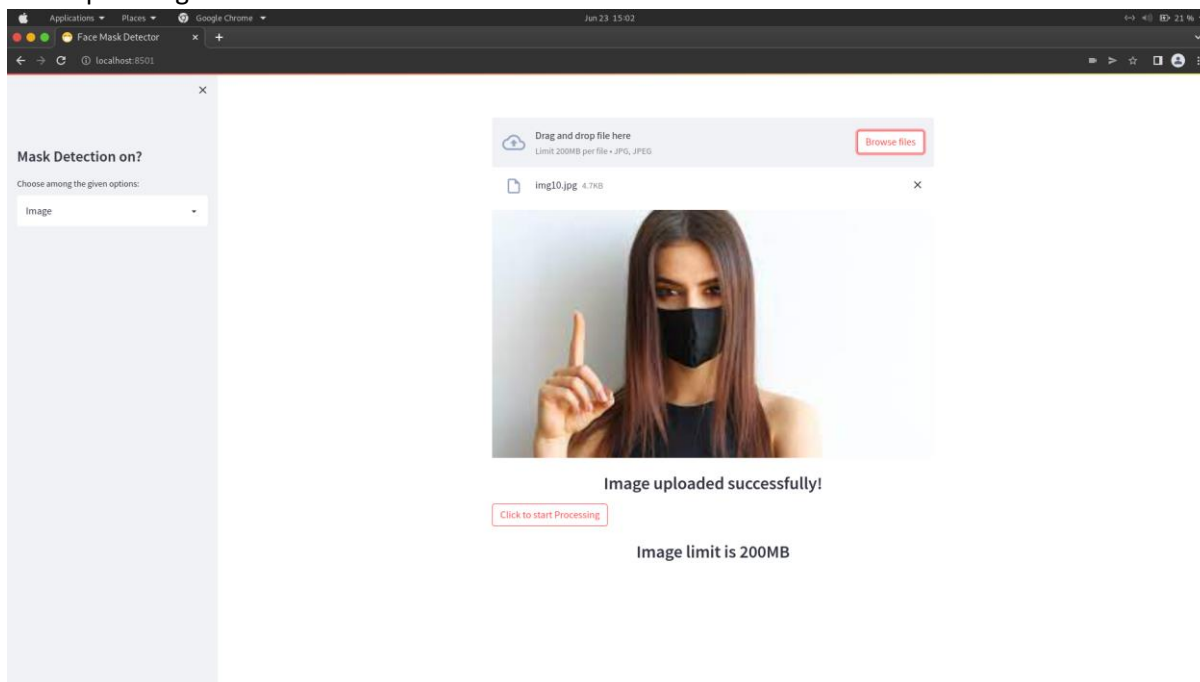

Based on user input this is how is start processing.

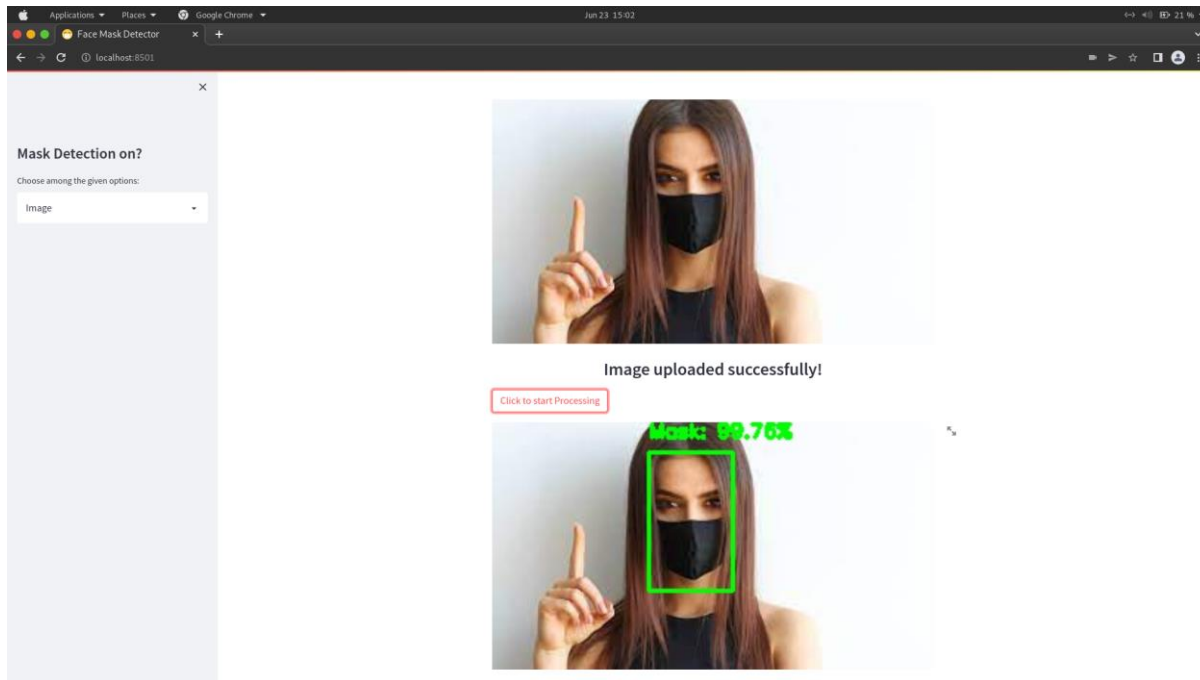

After input image uploaded successfully

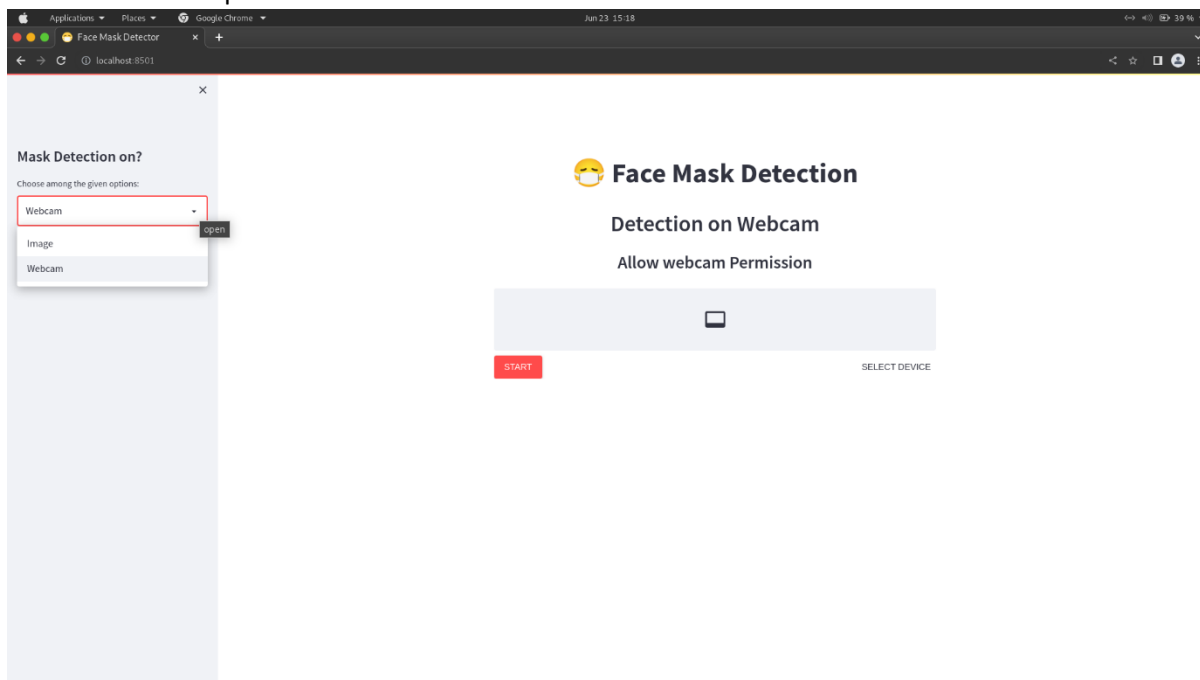

Start uploading click to Proceed

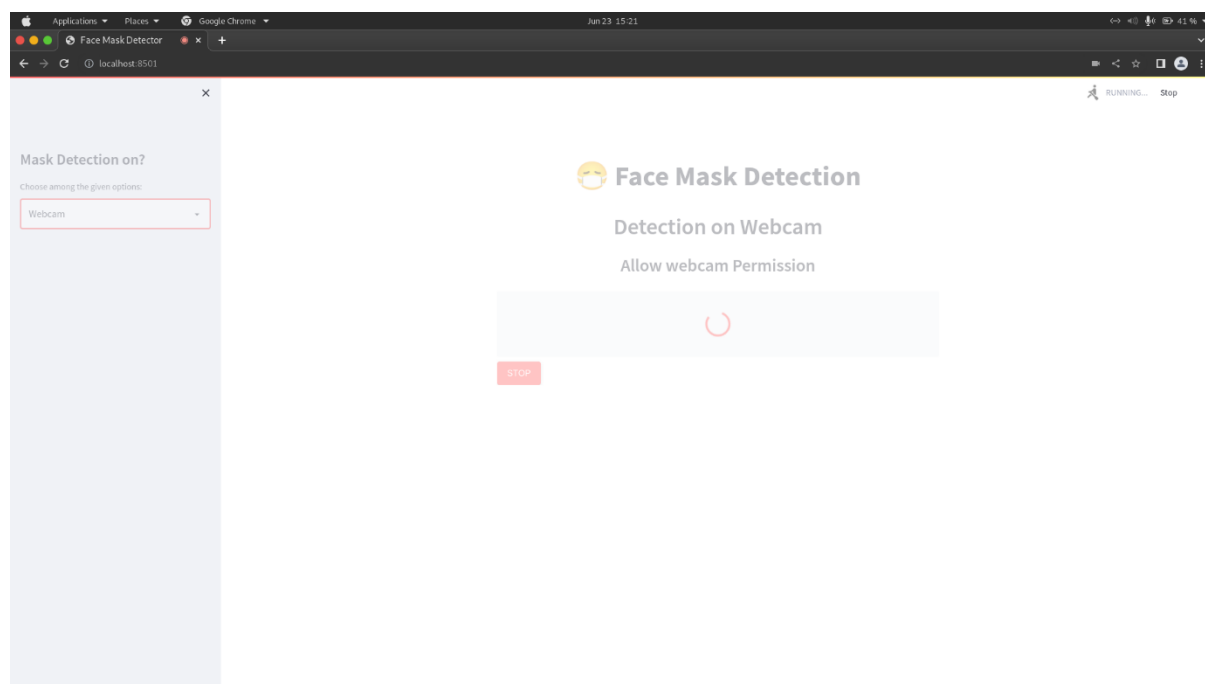

Output after analysing

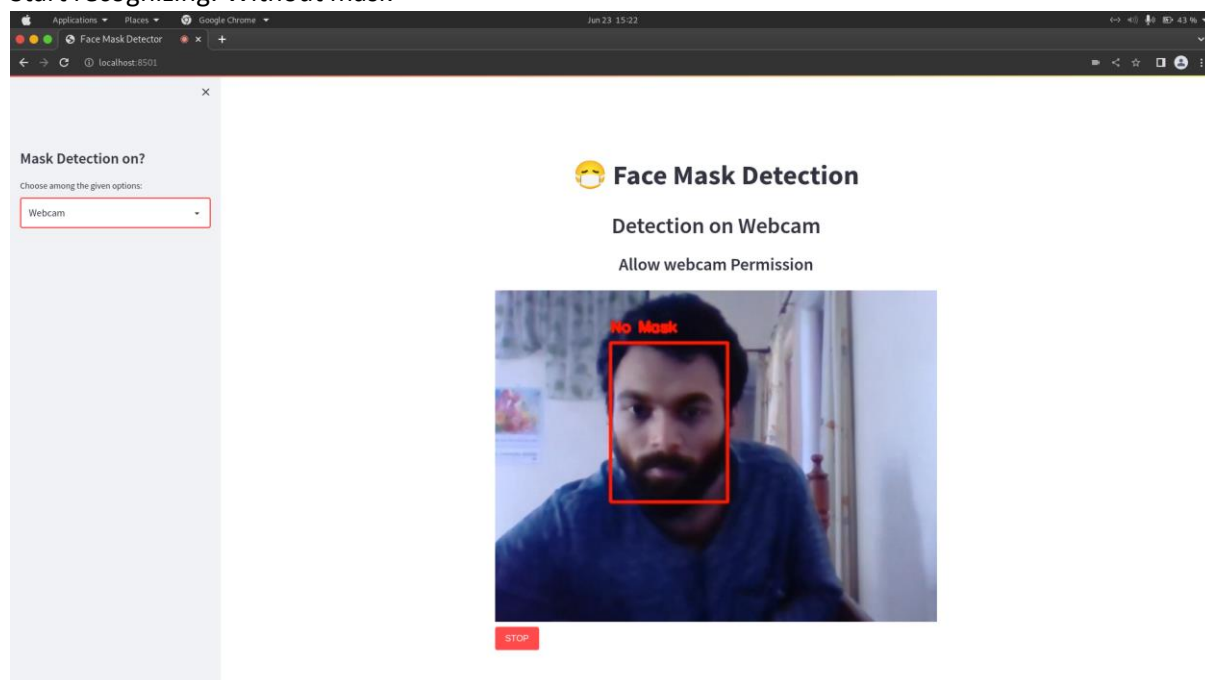

Next to webcam option click start

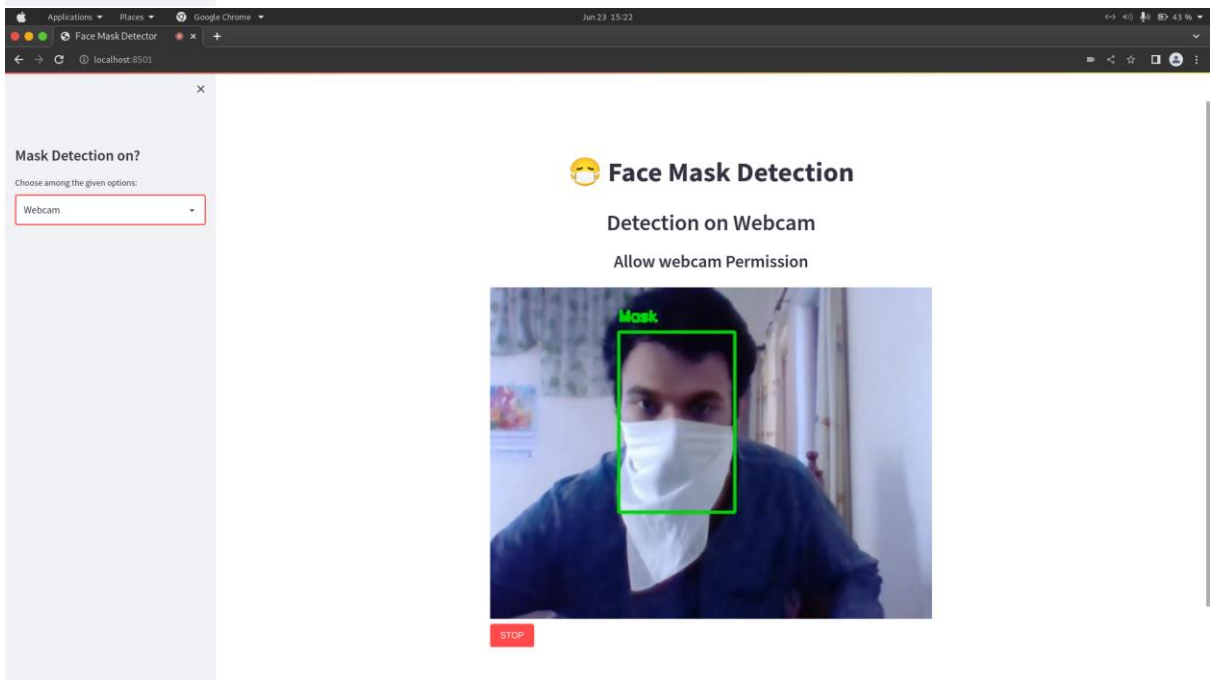

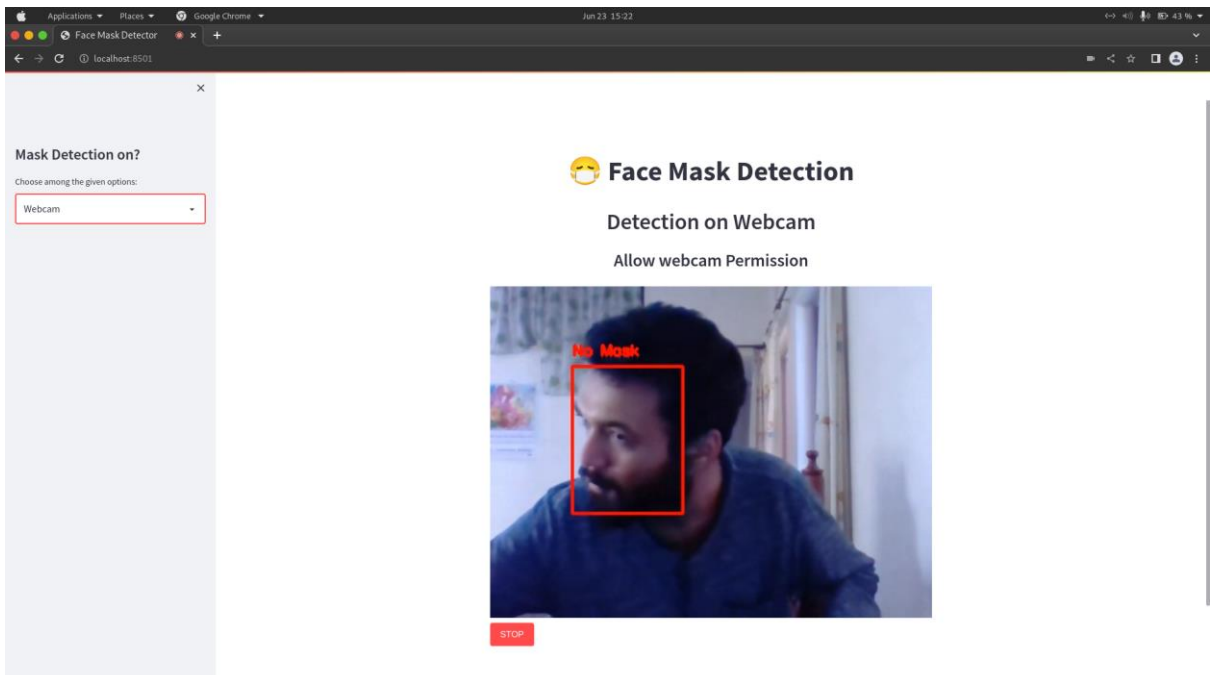

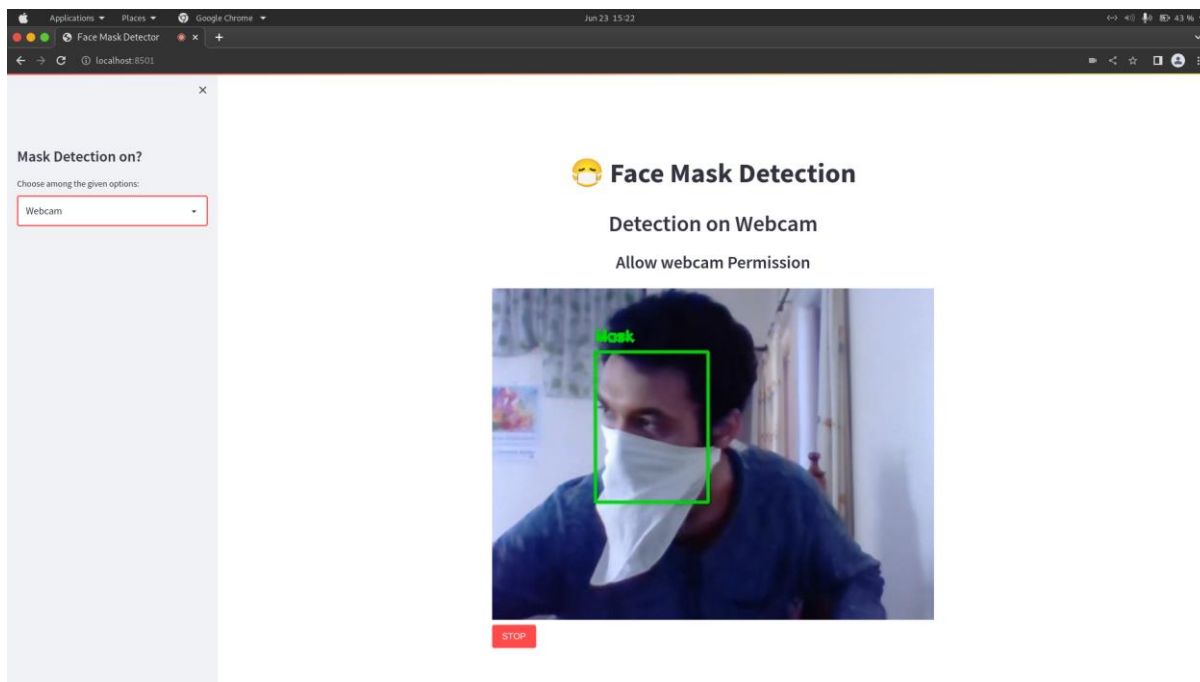

Based on user input this is how is start processing and ask for webcam permission.

Start recognizing. Without mask
